COUNTER MORTAR INTELLIGENCE REPORT
(for 24 hr period ended 031400A)

SECRET
3 Feb 45

ENEMY ACTIVITY

1. Mortars continued to be active during the period under review.
2. After a lull of over 2 months, rocket projectors opened up in the KRAMENBURG area, sq. 8055, at 021645A. They were the 21cm variety and 3 projectors were located. They were firing on the centre of sq 7556, and put down a fairly heavy concentration. Immediate retaliation was carried out by this office and 16 rds of 7.2" airburst, 16 rds of HAA airburst, and 16 rds of 25 pr percussion were spread over the rocket projector positions. Nothing has been heard of them since.
3. The presence of NBWs on our front now means that GHQ troops are present. This may mean a drawing up of reserves, but to date only the one section of NBW troops has been located.
4. NBWs have NOT been active on other parts of this front. But there are known NBW pits, unoccupied, at the following locations :-
788492 (5 pits), 788489 (6 pits), 788487 (6 pits), 779490 (6 pits).

6. The volume of Moreps from the infantry units has been very meagre on this front. The difficulty of submitting reports during an attack is fully appreciated, but we do look for Moreps as soon as the infantry have settled down. Any man with a compass may provide very valuable counter-mortar infm. Radar and other mechanical devices are NOT effective substitutes for Moreps.
