COUNTER BATTERY INTELLIGENCE REPORT

for 24 hr period ended 211600A

ENEMY ACTIVITY

1. H.P. activity increased slightly over the previous period.
The enemy's artillery fire now appears to have decreased considerably over the past ten days.

Activity re-opened in the neck of the isthmus at 21130A when a medium gun was reported active.

Only 7 Shells were received.

NEW H.P. LOCATIONS

2. A new H.P. was located at 61452184 by shellplot. This H.P. was active at 210830A and shelled M.P. 581158. It was reported to be medium fire.

3. Activity was reported at M.P. 672232 and this target was engaged by a Field regt using the A'r OP.

4. The H.P. which was active in the neck of the BEVELAND ISTHMUS was located at M.P. 546198, and M.P. 624182 was shelled by this battery at 211130A. It was difficult to obtain an accurate location of this battery and it was thought that target 5519 OM at M.P. 55121990 might be the battery causing the trouble. In any case, both positions were "dusted up" to make neutralization certain.

RETTALIATION

5. 5 bombards were carried out:-

6223 MO	M 300	=	5	rd	regt	Scale 1
5920 QR		=	5	rd	regt	Scale 2
6121 QV		=	5	rd	regt	Scale 2

6. The following H.P.s were included in the H.P. task table for the night of 20-21 Oct 44:-

62702390, 62732250, 8022PW, 6123 PJ, 6426 QK, 6625 QN

FOR period ended 231600A

ENEMY ACTIVITY

- 1 A slight increase in activity was noticed during this period as compared with the previous period.
- 2 Period of greatest activity was from 231000A to 231130A.
- 3 32 sheldrens were received.
- 4 Areas shelled included:-
 - (a) NEDERHEIDE sq 6120
 - (b) WORNSTRECHT sq 6119
 - (c) sq 6220
 - (d) HOOGERHEIDE sq 6219

RETALIATION

- 5 11 bombards were carried out against U.R.s.

GENERAL

6 Since all U.R.s seem to be situated fairly close to our front (most of them within 5000 metres), and since the majority are reported as field guns, it can perhaps be assumed that that are, for the most part, Infantry guns.

COUNTER BATTERY INTELLIGENCE REPORT

for 24 hr period ended 241600A

ENEMY ACTIVITY

- 1 There was little change in the activity as compared with the previous period.
- 2 13 Shells were received during the a/m period.
- 3 The greatest periods of activity were from 231800A to 231830A when area 588202 was shelled from the neck of the BEVELAND Isthmus, and from 241200A to 241230A when area 6120 was shelled from the area SOUTH EAST of BERTON OF ZOOM.
- 4 Areas shelled included:-

Sqs. 5820, 6120, 5620.

RETAIATION

- 5 Insufficient information was obtained to warrant immediate bombards.
- 6 On two occasions, targets were too close to our WTLs to bombard.

H.P.LIST

- 7 H.P.List No 7 is being issued forthwith.

CENTRAL

- 8 It is of interest to note that three 155 mm guns have been reported firing from the neck of the BEVELAND Isthmus. This battery could not be bombarded due to the lack of information reaching this office. In spite of the fact that our own troops were being shelled, only one shell was received, and that from the people being shelled.

An extract from A.T. Vol III Pam 11 is re-published for all concerned:-

"It is the duty of all artillery units in the field branch to submit to the CRO the fullest possible information regarding enemy artillery and to encourage and assist OTHER ARMS to send in similar reports."

- 5 Extract from RCA 2 Cdn Inf Div Intrep 281000A:

"Construction of the bridge held up due to mortar fire"

"Coms of Cdn unable to cross due to continual sniping and mortaring"

No moreps were received of this mortaring. It is again emphasized that this office cannot function properly and bring down immediate retaliatory fire without the passage of info from all forward troops.

If nothing else can be obtained even the following are of great assistance:-

- A. Time mortaring starts.
